WORK EXPERIENCE

Software Engineer

December 2024 – Present

Kaar Technologies Inc.(Client: Motiva Enterprises)

San Francisco, CA

- Developed scalable, responsive web applications using **React**, **JavaScript**, and **HTML/CSS**, ensuring seamless UX across browsers and devices.
- Integrated **REST-based backend services** with React using **Axios**, enhancing end-to-end data workflows and improving response times.
- Configured and optimized **Webpack** builds for efficient packaging and tree shaking, enhancing app performance.
- Contributed to Jenkins-based **CI/CD pipelines**, accelerating release cycles and improving deployment reliability.
- Conducted **peer code reviews** and collaborated across teams using Agile and Jira workflows to improve code quality and sprint velocity.
- Familiar with **Swift** and adaptable across modern frameworks.

Software Engineering Intern

(3 months) September 2024 – December 2024

Nestingale

San Jose, CA

- Designed and implemented **responsive UIs** using **HTML**, **CSS**, **Typescript**, **React**, and **Next.js**, increasing mobile engagement by 25%.
- Integrated **REST APIs** to build scalable frontend components, enhancing modularity and backend communication
- Built modular, accessible UI components using **Material UI**, aligned with WCAG accessibility standards.
- Developed **SQL** queries and supported backend systems using **AWS DynamoDB**, collaborating across teams to enable data-driven features.

Software Engineer

(2.5 years) Dec 2019 – July 2022

Tata Elxsi

Chennai, India

- Designed and delivered a full-featured OTT platform frontend using **React**, **Redux**, **JavaScript**, **Typescript**, **HTML/CSS**, and **REST APIs**, increasing user engagement by 20%.
- Led development of Payments and Subscriptions modules, optimizing page load by 25% through **performance tuning**, **code splitting**, and **lazy loading**.
- Deployed builds via **AWS S3** and **CloudFront**, ensuring global availability and scalability.
- Deployed microservices on **AWS ECS**, orchestrated asynchronous workflows using **AWS Step Functions**, and implemented event-driven logic with **AWS Lambda**.
- Managed **EC2**-based backend services and integrated deployments into existing CI/CD pipelines.
- Maintained CI/CD workflows using **Jenkins** and **Git**, shortening deployment timelines by 40%.
- Achieved **100% test coverage** using **JEST** and **React Testing Library** similar to **MochaJS**, reducing post-launch issues by 30% and greatly enhancing product stability and user satisfaction.
- Acted as a key contributor in Agile sprints, participating in backlog grooming, sprint planning, and mentoring junior engineers in **code reviews**.
- Collaborated across teams to lead UI refactoring efforts and ensure robust feature integration with backend services.

TECHNICAL SKILLS

Programming & Databases : JavaScript, C, C++, HTML, CSS, MySQL, MongoDB, Python

Frameworks & Libraries : React, Redux, Typescript, Jest, NPM, Webpack, React Testing Library, Bootstrap, jQuery, FetchAPI, Axios, Node JS, Express JS, React Native, RESTful API, JSON, SCSS

Tools & Others : Amazon Web Services (AWS), Google Cloud Platform (GCP), Git, Docker, Postman, Adobe, Figma, Jenkins, Jira, Linux/Unix, CI/CD, Agile, Algorithms, Cloud Native Apps.

PROJECTS

BugHound | React, Node.js, MongoDB, HTML, CSS, JavaScript | github.com/sritharni/BugHound

- Designed and implemented **RESTful APIs** using **Node.js** and **MongoDB** to handle bug tracking and data retrieval, ensuring secure and efficient data processing. Enhanced search, task management, permissions, testing, and quality assurance, resulting in a 20% decrease in error rates.

EDUCATION

California State University, Long Beach

August - 2022 - May 2024

Master of Science in Computer Science | GPA : 3.5/4

Coursework: Software Engineering, Advanced Algorithms, Distributed Systems, Object Oriented Design

Anna University

August 2016 - May 2020

Bachelor of Engineering in Computer Science | GPA: 3.6/4
